

# Give your students an edge in the workplace

Graduates require more than a first class education – they need experience in the real world with practical work integrated learning (WIL).

In fact, according to The Good Universities Guide, 10 out of 10 top universities ranked on Overall Experience ratings have a work integrated learning (WIL) element built into their programs.

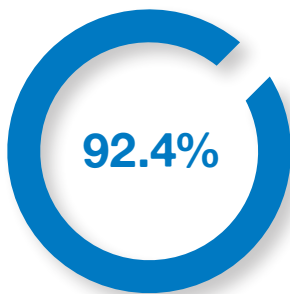

Navitas Professional has been delivering unparalleled career readiness solutions to tertiary students, graduates and young professionals since 2008 through a range of programs, such as WIL. Industry partners also benefit from the program, with a vast majority recommending our service.

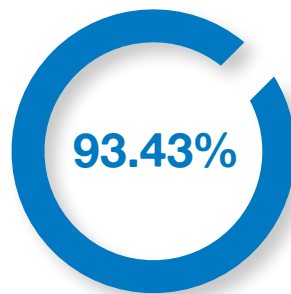

**94% of our industry partners would recommend Navitas Professional.**
